EDUCATION

Computer Science **2024 - Present**

BINUS University

- Currently taking Artificial Intelligence track, focusing on Machine Learning and Deep Learning.

PROJECTS

Real-Time Queue Management System **March 2026**

- Built an event-driven web-based queue management application using Node.js, Express, and Socket.io for real-time, multi-screen guest notification.

Gesture-Based Computer Vision Fruit Ninja **September 2026**

- Built interactive game application based on real-time hand gesture tracking on Python, OpenCV, MediaPipe, Pygame, and Streamlit WebRTC

EduRAG – Academic Document Question Answering System **October 2026**

- Retrieval-Augmented Generation (RAG) application based on Streamlit, Python, and LangChain which processes academic PDF to automatically answer questions based on the document's context. Integrating Gemini for chatbot.

PUBLICATION

"Evaluating the Impact of Text Preprocessing Techniques on Sentiment Classification" **October 2026**

Accepted & Presented at IITSOE 2026

- Conducting comparative research to evaluate the effectiveness of five social media-specific text preprocessing scenarios on the performance of sentiment classification models, using Twitter data.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, Java, C, SQL, HTML/CSS
- **AI, LLM & Data Pipelines:** LangChain, Google Gemini API, ChromaDB, PyMuPDF, OpenCV, MediaPipe, Streamlit
- **Framework & Frontend:** Pygame, Streamlit WebRTC, Socket.io, Node.js, ExcelJS, Express.js
- **Tools & Infrastructure:** Docker, Docker Desktop, Git, Arduino, Cisco Packet Tracer, Linux/Unix, pkg
